

Editing your pictures on Photobucket

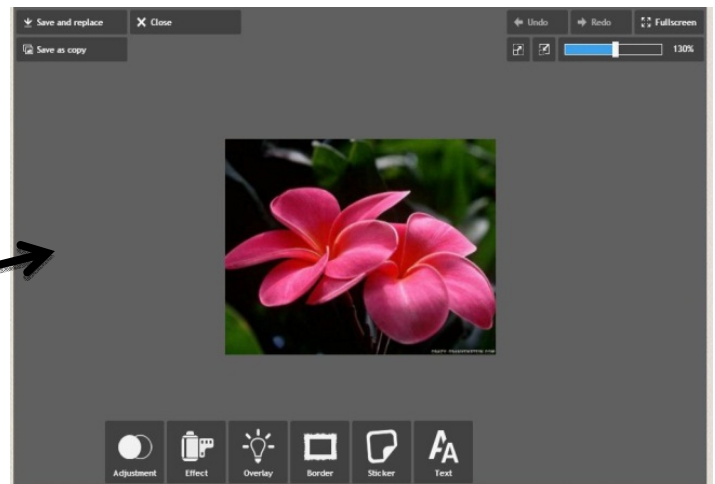

1. Press the editing button on the tool bar (Photobucket help document).

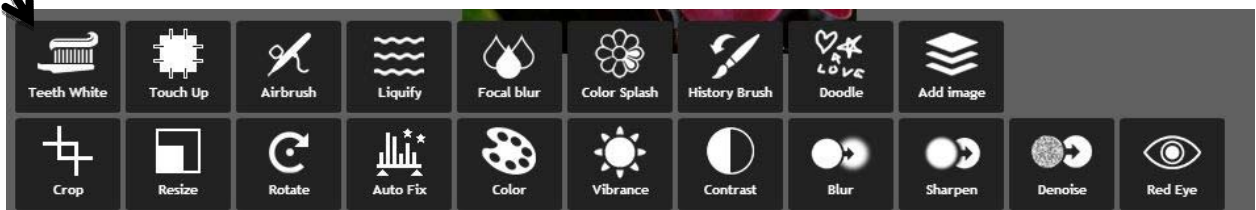

Select an item to start editing

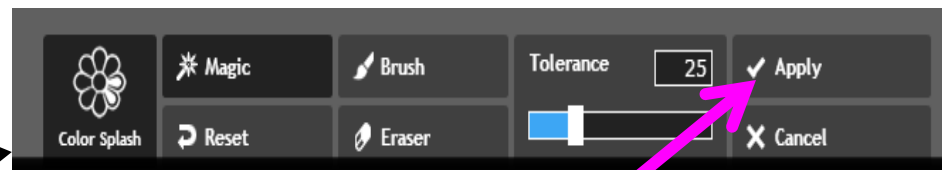

2. Click on the picture you would like to edit.

3. When you click on it will pull up this page. On this page you can adjust a lot of things as you see in this picture.

Just for an example, I picked color splash. There are multiple tools that you can use. On color splash there are magic, brush, and eraser.

When your finished editing, press the apply button, or if you want to redo your editing press the reset button.
